Course Type: Text/Transcript

Completion Date: 02/07/25

Score: **100%**

Presenter: H. Gustav Mueller, PhD

Course Description: This course reviews the practical issues regarding the use of self-report inventories in the hearing aid selection and fitting process, and how these inventories can be implemented into routine practice. Specific inventories are provided and explained, with case studies to illustrate how the findings impact counseling and the overall treatment plan.

40115 Complete and Incomplete Canalith Jam: Atypical Variants of BPPV and the Role of the Video-HIT in the Diagnosis

Course Type: Recorded Webinar

Completion Date: 02/07/25

Score: **100%**

Presenter: Andrea Castellucci, MD

Course Description: The webinar with Dr. Andrea Castellucci discusses the diagnosis of atypical variants of benign paroxysmal positional vertigo (BPPV), specifically focusing on complete and incomplete canalith jam. These conditions can mimic acute vestibular disorders and central nervous system issues. The video head impulse test (vHIT) plays a key role in differential diagnosis, helping clinicians distinguish these atypical BPPV variants from other vestibular or central pathologies.

40154 Research QuickTakes Volume 8: Hearing Aid Fitting Toolbox: Non-audiologic Considerations in the Selection and Fitting of Hearing Aids

Course Type: Recorded Webinar

Completion Date: 02/07/25

Score: **80%**

Presenters: H. Gustav Mueller, PhD; Brian Taylor, AuD

Course Description: This course reviews the prevalence of hearing loss, unmet hearing care needs, followed by a review of “stages of change” models and patient-centered care. We further discuss issues that can impact success with hearing aids such as: percept of problem, locus of control, listening fatigue, empowerment, and self-esteem. In the final section, we address the issue of mental health, and how HCPs can be involved with this important issue.

40109 eAudiology: Case-Based Options for Coding Audiology Services

Presenters: Annette A. Burton, AuD; Anna M. Jilla, AuD, PhD; Erin Miller, AuD

Course Description: Currently, many payers do not provide coverage to their beneficiaries for all services within audiology's scope of practice. Some payers only cover medically necessary hearing and balance assessment services with no coverage provision for therapeutic services. Additionally, most payers do not cover the assessment and management services performed by audiologists, which are necessary for quality patient care. Audiologists must be knowledgeable of payer-specific policies for those with whom they contract and determine if their reimbursement covers the cost of providing the service. This session discusses case-based coding/payment options for audiologists to consider when providing non-covered audiology services.

40268 Ethics for the Hearing Healthcare Professional

Course Type: Recorded Webinar

Completion Date: 02/04/25

Score: 80%

Presenter: Marjorie Klaskin, AuD, CCC-A

Course Description: Professionals in the hearing healthcare industry must follow a code of ethics. Ethical guidelines can vary based on experiences and perspectives; therefore, each practice should create their own specific code of ethics. These should be based on professional organization's guidelines such as the American Academy of Audiology or the American Speech-Language-Hearing Association. This course will discuss the difference between laws and ethics and the purpose of an ethics protocol in a hearing healthcare practice. An ethical decision-making matrix was also reviewed.
